

## Stormwater Debris Screens & Filters

### Catch Basin Hydrocarbon Filter Boxes & Hanging Screens

- Traps Hydrocarbons and sediment in catch basins with curb inlet openings
- Choose either Hanging Filter Screens or Multi-Filter Boxes, both constructed of 304 Stainless Steel
- Filter Pillows made of and filled with X-Tex recycled polymer fibers:
  - Hydrocarbon Absorption = 99%
  - Sediment Removal = +80%
  - Flow Rate = 500 gpm
- Top screen at 35% degree incline – keeps trash out of filter boxes while allowing stormwater to enter through ½” stainless steel expanded-metal top screen.
- More effective and one-third the initial cost of competitor filter boxes made from recycled content plastic. Replacement filters one-tenth the cost.
- Easy maintenance with hinged top and front panel.
- Permanent installations, 5 year warranty. Three compartments for different filter options to meet changing regulations.
- Compatible with Waterway Solutions’ trash-catching curb inlet & catch basin connector pipe screens.

Filter Boxes work great combined with Curb & Catch Basin Screens

304 Stainless Steel and one-third cost competitors' fiberboard boxes

Competitor's boxes fill with debris impacting filter effectiveness. Choose Waterway Filter boxes with slanted, screened opening to keep out trash.

Waterway Solutions' Multi-Stage Hanging Filter Box with X-Tex Hydrocarbon Filters
